olga-baeva

Full stack developer and QA engineer with a bachelor's in web development, currently completing a master's in computer science. I build APIs, websites and internal systems used by teams, and write tests to keep them reliable, from web apps to firmware verification. I balance clean, maintainable code with practical delivery and work mainly in JavaScript, TypeScript, C# and Python.

SKILLS

JavaScript | TypeScript | C# | Python | Node.js | NestJS | React | PostgreSQL | Git, GitHub | CI/CD

WORK EXPERIENCE

QA Software Engineer

GN Hearing

A global hearing healthcare company within GN Store Nord, developing and manufacturing advanced hearing aids.

Feb, 2026 - Present | Ballerup

Tasks

- Automate around 30-50 tests per month covering firmware functionality, including BLE, LoLA and sound processing
- Work with firmware engineers to identify, reproduce and resolve bugs, and test and debug firmware updates on prototype devices
- Manage user stories in Azure DevOps and take part in daily stand-ups and technical discussions

Full Stack Developer

Recruitio

A SaaS start-up focused on enhancing and refining a candidate-centric applicant tracking system (ATS) platform to streamline recruitment processes.

Mar, 2023 - Mar, 2025 | Copenhagen

Tasks

- Developed client-side features with a smooth user experience and cross-browser compatibility
- Built server-side business logic and REST APIs
- Designed, maintained and optimized the database, with a well-structured entity model and efficient data retrieval and storage
- Wrote and ran unit and feature tests to ensure reliability
- Worked with stakeholders to identify improvements and prioritize refactoring against requirements and deadlines
- Took part in sprint and release planning and peer code reviews to keep the codebase maintainable and scalable

Web Developer Student Assistant

Recruitio

Apr, 2022 - Aug, 2023 | Copenhagen, Denmark

Tasks

- Built platform features end to end, from user interfaces and server-side processing to database storage
- Fixed bugs and optimized UX, and took part in sprint planning in Jira

Front-end Development Intern

Recruitio

Jan, 2022 - Apr, 2022 | Copenhagen, Denmark

Achievements/Tasks

- Designed and developed a customizable career page integrated into clients' websites
- Optimized platform UI/UX and fixed client-side bugs

Software Engineer Intern
CSIS Security Group A/S

A cybersecurity company specializing in threat intelligence, malware analysis, and tools to help organizations detect and respond to digital threats.

Aug, 2023 - Oct, 2023 | Copenhagen, Denmark

Tasks

- Built features end to end, from specification and database work to testing and deployment, with unit tests and peer code reviews within a CI/CD workflow
- Monitored and fixed production bugs

EDUCATION

Computer Science
Roskilde University

Aug, 2025 - Jun, 2027 | Roskilde, Denmark

Courses

- Complex IT Systems
- Physical Computing
- Algorithms for Optimization and Planning
- Data & Things (Data Science, Machine Learning and IoT)
- Energy Consumption

Web Development
Copenhagen Business Academy

Aug, 2022 - Jan, 2024 | Kongens Lyngby, Denmark

Courses

- Frontend programming with JavaScript/ TypeScript/ React
- Mobile apps development with React Native
- Development environments with Git, GitHub, Docker
- Backend programming with Node.js/ Express.js/ NestJS
- Database architecture with MongoDB and PostgreSQL

Multimedia Design with focus on Frontend Development
Copenhagen School of Design and Technology

Aug, 2020 - Jun, 2022 | Copenhagen, Denmark

Courses

- Design and Development of digital solutions with an emphasis on user interfaces
- Development of digital experiences (UX) with a user focus
- Creation of advanced interactive web applications with HTML, CSS and JavaScript
